

# Richmond CoderDojo

# 23

Jan

🕒 11.30AM to 12.30PM

📍 Online.

Richmond CoderDojo is a free coding club open to young people aged 7 to 17 with sessions on Scratch, HTML, Python, and using micro:bits.

Due to the pandemic, we are currently running simplified, shorter coding sessions online via Zoom on the fourth Saturday of the month from 11.30am. For more information or to join a session, please email the Volunteer Coordinator directly on [libraryvolunteer@richmond.gov.uk](mailto:libraryvolunteer@richmond.gov.uk).

CoderDojo is an open source, volunteer-led global movement running free coding clubs for children and young people. At Dojos, young people learn how to develop websites, apps, and games; or program robots and other electronic devices. Dojos are set up and led by volunteers. In addition to learning to code, members meet like-minded people and share their coolest projects with 'show and tell' sessions. Our aim is to make development and learning to code a fun and sociable experience.
