Harlequins Foundation

Organisation Details

Description of activity

We deliver our own core programmes including Switch and METTLE as well as a range of projects designed and funded via Premiership Rugby. We also support local community organisations and charities through in kind donations and through small grants.

We have recently launched a long term partnership with the Movember Foundation to stop men dying too young. A group of Harlequins players took part in the Man of More Words campaign which launched on World Suicide Prevention Day 2018.

Our programmes and partnerships aim to inspire, educate and equip the people we work with, opening doors to new opportunities and transforming lives. We are proud of both the breadth of areas we work in for the size of our organisation and the difference we are capable of making.

Meaningful impact is important to us, so we ensure we monitor, evaluate and assess our programmes continually.
