Transport for All

Organisation Details

Description of activity

Transport for All (TfA) is the organisation of disabled and older people dedicated to champion the rights of disabled and older people to travel with freedom and independence in London.

London is one of the wealthiest cities in the world. Yet many transport services remain out of bounds for its disabled and older citizens. Physical barriers like flights of stairs, gaps and obstacles combined with the way transport services are run prevent many of us from getting out and about and living our lives. We want to live, work and enjoy our lives in a capital that is accessible to all. Access to transport is vital in making this happen.
